

Measure Up

Whenever you have a chance to raise your quality level lots of nice things start to happen. Defects and rework go down. Recalls and warranty claims go down. Complaints and costs go down. Efficiency and productivity go up.Customer satisfaction goes up. Your company's image goes up.

Announcing the New Model 600 Handheld Data Collector

ASI DATAMYTE's new model <u>600 Data Collector</u> gives you an opportunity to error-proof to a higher standard. The 600's new high-resolution color screen brings images and data together in a meaningful way to keep operators focused and precise, by:

- > Incorporating detailed on-screen instructions that reduce uncertainty. Guesswork is eliminated. All of the data is right there at the operator's fingertips.
- > Clarifying complex auditing routines and patterns through the importation of graphical illustrations.
- > Empowering the mastery of increasingly challenging data collection tasks. Operators can take on complicated assemblies containing hundreds of fasteners and joints with confidence and accuracy.

Web-Based Reporting

The 600's base data collection system includes powerful reporting capabilities which provide real time audit status and completion summaries. It is also web-based. Managers located in different plants across the country or around the globe will have immediate access to audit and test plan results.

Torque Applications

When used with the <u>Light Star</u> wrenches, the Model 600 measures torque as qualified by detected angular rotation. The data collector includes new algorithms for angle restart that let you customize applications for all types of joint mechanics.

Upgrade to the 600 Data Collector and start getting more returns out of your quality program. Contact us today for more information and/or to have a representative give you a call.
